

200SL/DL Profile

TOUGHLok™

by Mansea Metal

ToughLok 200 Single Lock and 200 Double Lock is a 2" mechanically seamed structural metal roof system that makes it an ideal choice for low to steep slope applications. ToughLok 200SL/DL is a versatile, performance-engineered solution that can handle heavy-duty commercial and industrial projects and provides very high wind uplift resistance and structural integrity. The panels are secured with concealed clips and the ribs are locked together reducing panel stress from changes in temperature, maintaining a uniform appearance.

Single Lock

Double Lock

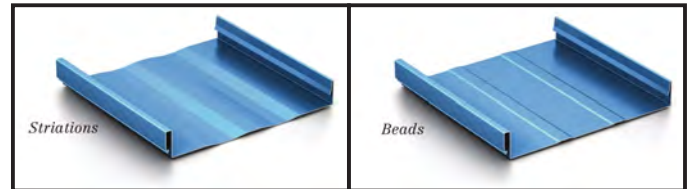

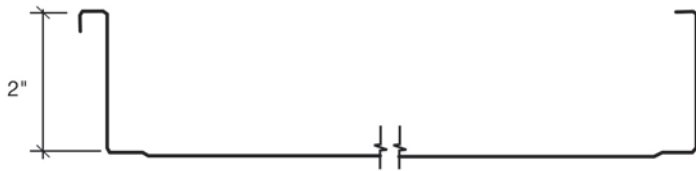

Applications:

➤ Commercial ➤ Institutional ➤ Structural

Available Widths:

16" or 18"

(Panel rib illustrations show 175SN profile)

Available Colors:

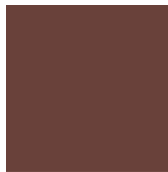

➤ Galvalume® - 22ga, 24ga, and 26ga
